Begründet 1924 unter dem Titel: Zeitschrift für Zellen- und Gewebelehre. Redigiert von *R. Goldschmidt* und *W. von Möllendorff*. Bd. 2—28 (1938). Zeitschrift für Zellforschung und mikroskopische Anatomie. (Bd. 1—20), 1934 als: Zeitschrift für wissenschaftliche Biologie (Abteilung B) herausgegeben von *R. Goldschmidt*, *W. von Möllendorff*, *H. Bauer*, *J. Seiler*. Bd. 29—33 (1944) Zeitschrift für Zellforschung und mikroskopische Anatomie Abteilung A. Allgemeine Zellforschung und mikroskopische Anatomie. Herausgegeben und redigiert von *W. von Möllendorff* und *J. Seiler*, Berlin, Springer. Bd. 34—35 (1948—1950) Springer, Wien, ab Bd. 36 Springer, Berlin, ab Bd. 34 ohne den Untertitel Abteilung A, Allgemeine Zellforschung usw.

Ab Bd. 2 (1925) mit dem Untertitel: Fortsetzung des SCHULTZE-WALDEYER-HERTWIGSchen Archivs für mikroskopische Anatomie. [Dieses wurde begründet 1864. Bd. 1—13 (1876) herausgegeben von *Max Schultze*; Bd. 13, Heft 4, bis Bd. 35 (1890) herausgegeben von *v. La Valette St. George*, *W. Waldeyer*; Bd. 36—43 (1894) herausgegeben von *O. Hertwig*, *v. La Valette St. George*, *W. Waldeyer*. Ab Bd. 44 als Archiv f. mikroskopische Anatomie und Entwicklungsgeschichte, ab Bd. 77—95 (1910—1922) in 2 Abteilungen. Bd. 1—95, Bonn, Cohen. Ab Bd. 96 Berlin, Springer. Fortsetzung Bd. 98—104 (1923—1925) Archiv für mikroskopische Anatomie und Entwicklungsmechanik. Herausgegeben von *W. Roux*, *H. Braus*, *H. Spemann*.]

The journal was founded in 1924 as the Zeitschrift für Zellen- und Gewebelehre. Vols 2—28 (1938) edited by *R. Goldschmidt* and *W. von Möllendorff*. Zeitschrift für Zellforschung und mikroskopische Anatomie (Vols 1—20) (1934) as: Zeitschrift für wissenschaftliche Biologie (Abteilung B) edited by *R. Goldschmidt*, *W. von Möllendorff*, *H. Bauer*, *J. Seiler*. Vols 29—33 (1944) as: Zeitschrift für Zellforschung und mikroskopische Anatomie, Abteilung A, Allgemeine Zellforschung und mikroskopische Anatomie, edited by *W. von Möllendorff* and *J. Seiler*, from Vol. 34 without the subtitle, Abteilung A, Allgemeine Zellforschung etc. Published: Vols 34—35 (1948—1950) Springer, Wien, from Vol. 36, Springer, Berlin.

From Vol. 2 (1925) with the subtitle: continuation of the SCHULTZE-WALDEYER-HERTWIG Archiv für mikroskopische Anatomie. [This journal was founded in 1864: Vols 1—13 (1876) edited by *Max Schultze*; Vol. 13, No. 4, to Vol. 35 (1890) edited by *v. La Valette St. George*, *W. Waldeyer*; Vols 36—43 (1894) edited by *O. Hertwig*, *v. La Valette St. George*, *W. Waldeyer*. From Vol. 44 as Archiv für mikroskopische Anatomie und Entwicklungsgeschichte, from Vol. 77 to Vol. 95 (1910—1922) in 2 sections. Published: Vols 1—95, Bonn, Cohen, from Vol. 96, Berlin, Springer. Continued Vols 98—104 (1923—1925) as Archiv für mikroskopische Anatomie und Entwicklungsmechanik, edited by *W. Roux*, *H. Braus*, *H. Spemann*.]

Instructions to the Authors

1. Manuscripts (typewritten, double-spaced) should be carefully prepared in the style of this journal and proof-read before being submitted. Typographical errors should be corrected legibly. The material should be arranged under the following headings: Introduction, Material and Methods, Results, Discussion, and References. The text should be concise and consistent as to spelling, abbreviations, etc. Pages should be consecutively numbered. The inclusion of a carbon copy with the original is recommended in order to facilitate editorial processing. Changes in the proofs should be kept at a minimum; a charge will be made for changes introduced after the manuscript has been set in type.

Correct language is the responsibility of the author(s). Authors' writing in a language which is not their mother tongue are advised to have their writing checked and if necessary amended by a colleague thoroughly familiar with the language in question.

Brief accounts of particularly interesting results will be printed out of turn as "Short Communication". They should not exceed 2 or at the most 3 printed pages including a table or figure, should this be necessary. The Editors reserve the right to decide what constitutes a "Short Communication".

2. Each paper should be preceded by a **brief summary** of not more than 200 words.

3. Key words. Immediately following the summary not more than 5 English Key words should be supplied for subject indexing. Key words be taken from the Index Medicus (Medical Subject Headings) or, failing this, composed on the same principles.

4. On the first page of the manuscript the author should furnish the following information: Department, Title, Author(s), Running head (condensed title), not exceeding 72 letters and spaces, and Address to which proofs should be sent.

5. All **footnotes** containing dedications and short acknowledgements to persons and organizations should be inserted on the first page. The footnotes, which do not belong to the head of the article should be numbered consecutively.

6. Small print. Text of secondary importance, including Material and Methods, should appear in small print and must be indicated as such.

7. Literature references. In the text, names of authors should be followed by the year of publication (in parentheses). All papers mentioned in the text, and only these, should be cited in the bibliography.

In the bibliography the following information should be provided for **journal articles**: names and initials of all authors, complete title of paper, name of journal (abbreviated in accord with World Medical Periodicals), number of volume, first and last pages, and year of publication.

Books are cited by listing the authors' names, full title, edition, place of publication, publisher and year.

The **bibliography**, to be placed at the end of the paper, should be in **alphabetical order**. Several publications by the same author or group of authors should be listed in chronological order; those that appear in the same year should be distinguished by the suffixes a, b, c, etc.

8. Illustrations. All figures including **graphs** are to be numbered consecutively as text figure (Arabic numerals). They must be submitted in finished form on separate sheets. All should have descriptive legends. These must be typed (double-

spaced) in numerical order and placed at the end of the manuscript. As with the text, a duplicate set of illustrations will aid editorial processing.

The number and size of the illustrations must be kept to a minimum required for clarification of the text. Only figures not previously published are to be used. Explanations of figures furnished as legends should not be repeated extensively in the text. Numerical data given in graphs or tables must not duplicate each other. As a rule, requests for color reproductions cannot be approved. The journal is not subsidized in any way. Therefore, for papers with **an excessive number of illustrations** (even though the editors agree that they are essential) it is necessary to ask the author, or his institution, to make a contribution toward the cost of reproduction.

From the technical point of view, there are two types of illustrations, line cuts (black and white, with no variation in tone or shading) and halftones (photographs or drawing with variations in shading). Halftones should be submitted only if line cuts (with stippling, crosshatching, etc.) cannot adequately convey the information intended.

Line drawings and graphs should be drawn with Indian ink in clean, uniform lines on smooth white paper or Bristol board. Under special circumstances, clearly prepared sketches may be redrawn by the publishers. Photographs must be clean, glossy prints in sharp focus and with strong contrast. They must be trimmed at precise right angles. Halftone drawings must be submitted in the original. To facilitate editorial processing, diagrams should be submitted initially in the form of photocopies rather than oversized originals. If the paper is accepted, the author must then transmit the originals directly to Springer-Verlag. Magnifications should be indicated where pertinent.

The lettering of electron micrographs with Letraset (instant lettering) is recommended; authors should take into consideration reductions called for during the printing process. If the labelling with Letraset is not possible it is done by the publisher in a size adjusted to the scale of reproduction. *In this case lettering must be placed on a cover sheet of transparent paper.* This overlay may also show any deletions required and edges which should be trimmed off. Lead-lines or arrows may also be drawn on the overlay, and the author should fix the end points by sticking them through to the underlying original with a small needle.

The author may designate areas he considers of special importance on the cover sheet so that the engraver can give them his special attention. Also any cutouts or dispensable marginal areas desired may be indicated.

The author's name, and instructions regarding the desired linear reduction or magnification, should be indicated on the reverse side of the illustration by means of a very soft lead pencil, to avoid indentations. It must be emphasized that the maximum area available for the reproduction of a figure (or an array) is 122×195 mm ($4\frac{3}{4} \times 7\frac{1}{2}$ inches).

9. Tables should be numbered consecutively with Arabic numerals. They should be typed on separate sheets.

10. Please mark in the margin of the manuscript the desired **position of figures and tables.**

11. Mailing. Manuscripts and illustrations should be safely packed in order to avoid damage in transit.
